

ELIMINATOR*

Eliminator is the worlds #1 axle. It features a proprietary heat treating process that provides excellent wear and strength characteristics. It is then polished and chrome plated, giving you a product that is superior in strength as well as good looks. Wheelbase and offset may be adjusted by 2" by simply swapping spline spacer locations. Eliminator 2+2 axles give you a choice of increasing the rear axle track 2" or 4" wider than the stock axle width.

(*come without nuts except for ref. RD20.1142SP).

AXLENUT

RD20.1602

* Only for RD20.1142SP.
