

◀ KIT HYDRODYNAMICS USA ▶

The most complete ATV front A-Arm kit in the world featuring the 100% 4130 Chromoly Alloy +2 Phantom A-Arms. This revolutionary kit literally has everything you could possibly need for the front of your ATV less the Shocks.

Most Arms feature zerk fittings in all pivot points to allow for ease of maintenance. The perfect castor is designed into the arm eliminating the need for expensive, hi-wear helm joints. The +2 inch wider design and data acquisition determined placement of the shock mounts result in a dramatically improved wheel force curve which provides an unequalled feeling of stability and control with dramatically increased wheel travel.

Combine the Phantom Arms with a set of fully adjustable iShock F8 or P51 shocks and experience a whole new level of performance.

- Kits include :**
- A-arms - Spyder lines - Tie Rods - Knuckles ball joints
 - Grunts (Billet aluminium brake line clamps)
 - Bushing/Sleeves - Ball Joint Press Tool - Installation DVD.

DVD INCLUDED
